Overview

AVC-ELN41AVT

- Fixed screw Ethernet connector 1 5
- Audio input connector Microphone 2
- 3 Power connector Micro SD card slot 7
- Mounting base 4 8 Reset

- * 1,It is recommended to install the security cap for outdoor installation.
- * 2, If the PoE switch is used to power the camera, DC12V power supply is not required.

Overview - Connecting Network Cable

AVC-ELN41AVT

Step 1: Loosen the nut from the main element.

Step 2: Run the network cable (without RJ 45 connector) through the both elements. Then crimp the cable with RJ 45 connector.

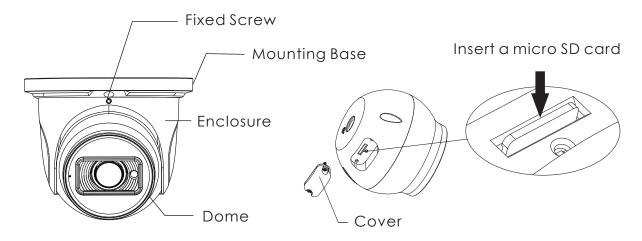

Step 3: Connect the cable to the hermetic connector. Then tighten the nut and the main cover.

Camera Installation

AVC-ELN41AVT

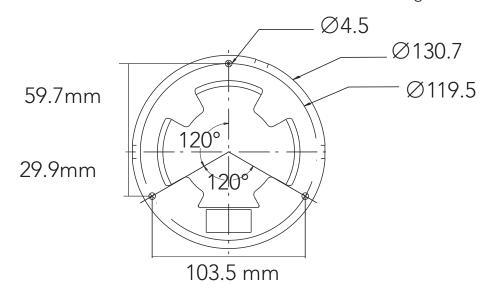

Please make sure that the wall or ceiling is strong enough to withstand 3 times the weight of the camera. Please install the camera under dry environment.

Step 1: Loosen the fixed screw to disassemble the camera. Then open the cover of the dome and then insert a micro SD card. After that, install the cover back. Finally, install the dome and enclosure to the mounting base with the fixed screw, but do not fully tighten.

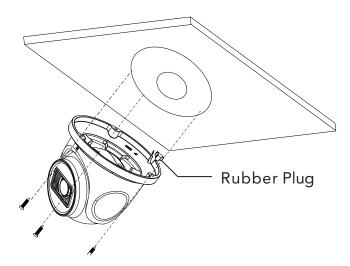

- * Note: *Check whether the waterproof ring on the card slot cover is installed properly before installing the cover back.
- * Please install the cover in the same way you disassemble it, so that the sealing performance will not be affected.

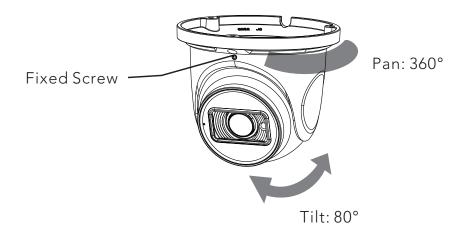

Step 2: Drill the screw holes and the cable hole on the wall according to the drill template.

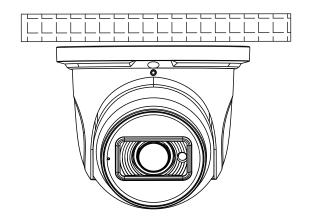

Step 3: Route and connect the cables and then secure the camera to the ceiling or wall with the screws.

Step 4: Adjust the camera to obtain an optimum angle. Before adjustment, preview the image of the camera on a monitor.

Step 5: After that, tighten the fixed screw.

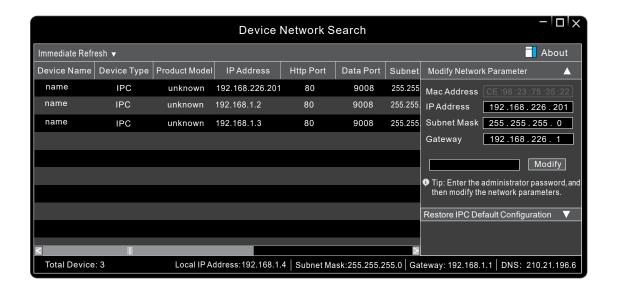

Network Connection

AVC-ELN41AVT

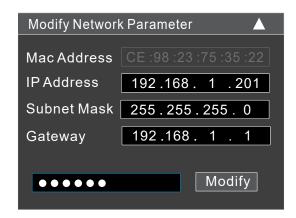

Access through IP-Tool

- Step 1: Make sure that the camera and the PC are well connected to the local network.
- **Step 2:** Install IP-Tool from the CD and run it after installation.

Step 3: Modify the IP address. The default IP address of this camera is 192.168.226.201. Click the information of the camera listed in the above table to show the network information on the right hand. Modify the IP address and gateway of the camera and make sure its network address is in the same local network segment as the computer's. Please modify the IP address of your device according to the practical situation.

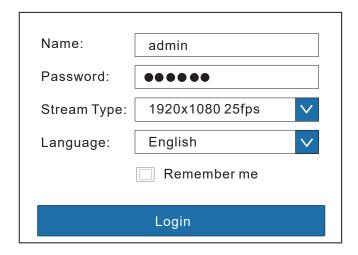

For Example, if the IP address of your computer is 192.168.1.4 then the IP address of the camera shall be changed to 192.168.1.X.

The default password of the administrator is "123456".

Step 4: Double-click the camera listed in the IP-Tool or manually enter the IP address in the address bar of the web browser to connect IP camera. Then follow directions to download and install the plugin.

Step 5: Enter the username and password in the login interface.

The default username is admin; the default password is 123456.
