AVYCON

A New Standard for
Professional Surveillance

Since our founding in 2012, AVYCON has grown into a leading provider in the video surveillance industry. We leverage advanced embedded analytics and technology to deliver reliable performance and effective security monitoring across our video surveillance products. We are committed to manufacturing and supplying high-quality, modern products while maintaining a strong focus on providing superb customer service and technical support to our clients. Our solutions are designed to satisfy both your commercial and residential needs. As we continue to expand, our commitment remains unwavering to deliver secure and dependable security products globally.

AVYCON HQ in California

AVYCON CX Center in California

Starllion™ is a highly scalable, enterprise-level platform that empowers incumbent hardware with advanced cloud video management capabilities, yielding optimized and efficient surveillance architecture. Starllion™ deploys seamlessly without requiring hardware, software, or licensing overhead, offering effortless plug-and-play connectivity and eliminating the need for port forwarding. The platform furnishes users with centralized cloud management, supporting unlimited viewers and multi-site access, and leveraging AI Cloud Analytics for advanced real-time functionalities like facial recognition and object tracking.

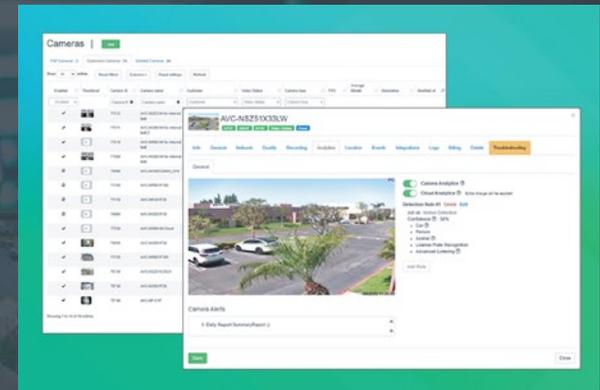

Starllion™ Products

Video Portal

The definitive, unified platform for seamless, intelligent Video Asset Management.

Engineered for superior performance and simplicity, the Starllion™ Video Portal furnishes users with indispensable tools that elevate the entire video management lifecycle. Effortlessly orchestrate cameras, triage events, structure media archives and timelines, and leverage intuitive features meticulously tailored to optimize your entire surveillance ecosystem.

Admin Portal

Effortless surveillance oversight for all remote installations.

This robust platform streamlines surveillance management, from monitoring system metrics and user permissions to orchestrating cameras, providing all essential tools needed to optimize the efficiency of your security operations.

Alarm Portal

The intelligent, definitive solution for Centralized Monitoring optimization.

Deliver instantaneous protection for Security Operations Centers (SOCs), integrators, and monitoring stations by consolidating and automating video surveillance, remote guarding services, and comprehensive IoT device management.

Mobile Portal

Your entire surveillance ecosystem, simplified and available in your pocket.

Easily access Starllion™ Cloud from your mobile to view live video, archived footage, real-time events, and more within one seamless platform.

AVYCON Solutions

Financial Institutions

AVYCON delivers customized digital surveillance solutions for the banking and finance sector.

Critical Infrastructure/Construction

AVYCON delivers scalable, high-impact surveillance for construction sites with high-resolution cameras and advanced analytics to prevent theft and vandalism in real time.

Healthcare

AVYCON provides intelligent, customized surveillance for healthcare facilities, using advanced AI and real-time alerts to protect patients, staff, and assets while improving efficiency and incident control.

Manufacturing Industries

AVYCON provides intelligent, tailored surveillance for manufacturing, using high-resolution cameras and AI to prevent theft, enhance automation, and improve productivity across multiple sites.

Casinos

AVYCON delivers tailored surveillance solutions for gaming venues, reducing risks like theft and fraud while ensuring compliance and safety for staff and customers.

Education

AVYCON enhances campus safety with intelligent, customized systems that prevent unauthorized access, reduce vandalism, and enable rapid crisis response.

Hospitality

AVYCON provides tailored surveillance solutions for hospitality businesses, using high-quality video and insights to protect guests and staff while improving efficiency.

Retail Businesses

AVYCON enhances retail security and profitability with scalable, AI-powered surveillance that deters theft, alerts staff in real time, and ensures a safe environment for all.

AVYCON Professional-Grade AI Network Cameras

This expansive collection of AVYCON Network Camera series is designed for versatile and demanding surveillance applications. The portfolio features a clearly defined tiered structure of capabilities, ensuring an optimal match for every security requirement.

This comprehensive suite of intelligent video security solutions is built upon the most prevalent camera styles such as Turrets, Bullets, and Domes, and is organized across multiple series from NA through NU. Models are categorized by functional tiers, ranging from Accessible to Professional and Enterprise grade, with a core focus on Artificial Intelligence capabilities that extend from AI Lite analytics to more advanced AI for sophisticated video analysis. The high-tier offerings include Active Deterrence features, while the InfiniteColor technology found in the NA, NB, NC, and ND series provides vivid, color-accurate imaging even in challenging low-light conditions. Specialized units such as the NU series Ultra-Low Light cameras are also included to address specific operational needs, resulting in a resilient and adaptable portfolio of effective solutions.

Advanced AI-Powered Specialty Cameras

This diverse collection leverages full artificial intelligence (AI) across a range of form factors to deliver intelligent, comprehensive surveillance. The offerings are designed for various deployment needs, from wide-area coverage to specialized functions.

This camera portfolio offers diverse, AI-enhanced solutions for various security needs, from wide-area coverage to specialized access control. Options include Thermal imaging cameras and Multi-Sensor cameras for flexible monitoring, alongside Panoramic/Fisheye options for expansive views. The line also features PTZ multi-function cameras for dynamic tracking and Doorbell cameras with embedded AI for secure entry-point monitoring integrated with a mobile app. For deployment flexibility, the Solar Solution provides power-independent cameras for remote installations and SIM card capability. This collection provides a variety of high-tech cameras, all enhanced with AI capabilities for smarter, more efficient security.

FLAT MOUNTING PLATE

CHIME KIT

TILT MOUNTING PLATE

WIRELESS CHIME

WEDGE MOUNTING PLATE

Model	AVC-SNDB41M-4G
Special Features	Solar Power, InfiniteColor, 2-Way Audio, AI, 4G LTE
Max. Resolution	4MP (2688x1520) @30fps
Lens	2.8-12mm Motorized, F1.1
Min. Illumination	Color: 0.0005 lux @F1.0 (AGC on) B/W: 0 lux (IR LED on)
Image Sensor	1/1.8" Progressive CMOS
Smart Analytics	Pedestrian & Vehicle, Intrusion, Tripwire, Stationary Object, Tripwire Count, Heat Map, Crowd Density, Queue Length, License Plate, Rare Sound, Loitering, Region Entrance, Region Exiting
Audio Support	Built-in MIC / Built-in Speaker
Alarm In/Out	1 Input / 1 Output
MicroSD Storage	Micro SD/SDHC/SDXC Slot (512GB)
Protection	IP67
Power	4-pin waterproof DC 3.5V connector

Battery	Rechargeable lithium battery
Capacity	8400mAh
Battery Quantity	4 units
Voltage	10.8V
Maximum Charging Voltage	12.6V
Coulomb Counter	Supported
Operating Time	AOV mode (low power mode) around 19 days during overcast weather
Operating Temperature	Charge : -4°F ~ 113°F (-20°C ~ 45°C) Discharge : -4°F ~ 140°F (-20°C ~ 60°C)

Concise High-Definition Analog Cameras

AVYCON's comprehensive and versatile line of Analog High-Definition cameras delivers high-resolution surveillance across four core form factors: Turret, Bullet, Dome, and Vandal Dome. Designed for affordability and ease of use, this series supports all major video formats including CVI, AHD, and TVI, making dependable, high-quality surveillance accessible for a wide range of applications.

This collection of TVI cameras addresses diverse installation requirements through its variety of durable housing and consistent image quality. Every model consistently provides options for 2MP, 5MP, and 8MP resolution, allowing for a scalable and consistent approach to security system design. This focus on diverse physical designs and versatile resolution options makes the series suitable for reliable deployment in nearly any environment.

NVR/DVR

High-Performance NVR/DVR Systems

AVYCON's NVR/DVR seamlessly supports both network and analog surveillance. NVR simplify IP camera installations with built-in PoE ports and advanced Dual NIC networking for robust connectivity. DVR deliver high-resolution analog recording up to 5MP Lite and 8MP (4K) resolution for superior clarity and performance.

This recorder portfolio provides flexible solutions for both network and analog security systems. Network Video Recorders (NVRs) simplify IP camera installations with models featuring onboard PoE for power and data, while others offer Dual NICs for enhanced network management and high-throughput applications. For analog systems, Digital Video Recorders (DVRs) are designed to support high-resolution formats, including economical options with 5MP Lite resolution and premium models capable of full 8MP recording. This comprehensive lineup is engineered to meet industry standards, ensuring reliable and compliant performance across diverse installation environments.

Network Solutions

Versatile High-Performance Networking Solutions

AVYCON's networking collection delivers versatile, high-performance solutions for any environment, including 100 Mbps PoE switches, Gigabit PoE models, and long-range wireless network bridges. Designed for seamless integration and effortless scalability, it ensures robust performance across all surveillance and enterprise networks.

Build a complete, reliable network with our full range of connectivity solutions. Choose cost-effective 100 Mbps PoE injectors, high-speed indoor Gigabit PoE switches with RJ-45 uplinks for seamless integration, or rugged outdoor and industrial-grade PoE switches designed for harsh environments. We also offer standard non-PoE switches and PoE-powered Wi-Fi CPE bridges to extend wireless networks and simplify remote deployments.

IP Speakers

Advanced SIP/ONVIF Network Speaker

The AVS-IPHS series is a robust, all-in-one smart IP speaker designed for clear, powerful, and versatile audio delivery in any environment. It features PoE support, crystal-clear DSP sound, and an IP66-rated waterproof design for seamless integration with SIP and ONVIF-based security systems.

The AVYCON IP Speaker is an advanced, all-in-one smart audio solution designed for clear, powerful delivery in any environment with its IP67 waterproof design and Power over Ethernet (PoE) support. Its built-in Digital Signal Processor (DSP) ensures crystal-clear audio. The speaker integrates seamlessly with your security infrastructure via ONVIF and SIP, enabling it to broadcast alarms and security messages for effective deterrence.

Model	AVS-IPHS15W	AVS-IPHS15WM	AVS-IPHS30WM
Max Sound Pressure Level (SPL)	113dB	113dB	120dB
Built-in Microphone	-	Yes	Yes
Network Protocol	SIP, ONVIF, HTTP, IPv4, DHCP, RTSP, RTP, RTCP, TCP, UDP, ARP, FTP, TFTP, NFS, NTP	SIP, ONVIF, HTTP, IPv4, DHCP, RTSP, RTP, RTCP, TCP, UDP, ARP, FTP, TFTP, NFS, NTP	SIP, ONVIF, HTTP, IPv4, DHCP, RTSP, RTP, RTCP, TCP, UDP, ARP, FTP, TFTP, NFS, NTP

Testers

Professional All-In-One CCTV Camera Tester

The AIVO camera tester is a comprehensive all-in-one CCTV tester, providing simultaneous support for 8MP HD Analog and 4K IP camera testing alongside essential power, cable, and digital multimeter troubleshooting tools.

The AIVO camera tester is a professional, all-in-one tester designed to streamline CCTV installation and troubleshooting across all major formats. This robust tool simplifies IP surveillance setup using its IP Discovery Tool to rapidly detect and scan connected IP cameras, while the ONVIF Tool provides comprehensive testing for any ONVIF compliant cameras. Beyond IP, it supports HD Analog testing up to 8MP (HD-CVI/HD-TVI/AHD) and includes essential features like PoE power output, cable length and quality testing, and a built-in digital multimeter, consolidating numerous field instruments into a single, high-resolution device.
